Summary

Creative and detail-oriented Frontend Developer with a strong foundation in HTML, CSS, and JavaScript, and practical experience in crafting responsive, user-focused web interfaces. Adept at transforming design concepts into functional, visually appealing web pages with an emphasis on performance, usability, and cross-browser compatibility. Eager to leverage hands-on skills and experience to bring innovative and impactful user experiences to a forward-thinking team. Currently seeking new opportunities to contribute to and grow within a dynamic development environment.

Experience

Amazon
Go-AI Associate
Hyderabad
May 2024 - Aug 2024

Analyzed stowing actions at fulfillment centers by reviewing videos, applying human judgment and tool-based validation to ensure accurate activity identification. Verified product locations with high precision, contributing to stow quality standards. Performed meticulous video and image annotations, maintaining accuracy and efficiency to support fulfillment operations.

Projects

Ai-assistant-app

April 2025

AI Assistant Platform

A full-stack application integrating multiple AI models to provide intelligent assistance through chat, code generation, and image creation.

Features

AI Chat Interface : Engage in natural conversations with advanced AI models

Code Generation : Get programming assistance and code snippets for various languages

Image Generation : Create images from text descriptions using DALL-E

Dashboard : View analytics, conversation history, and settings at a glance

Model Settings : Customize AI parameters including temperature and max tokens

Conversation History : Review and continue previous AI interactions

Technologies Used

Frontend

- React.js with TypeScript
- TailwindCSS for styling
- shadcn/ui component library
- React Query for data fetching
- Wouter for routing

Backend

- Node.js with Express
- RESTful API architecture
- OpenAI API integration
- In-memory data storage
